PRESS RELEASE

Nufringen, 2 February 2023

Changes to senior and divisional management

Ralph Pernizsak now additionally in charge of the insulbar division

At Ensinger, a staff change is taking place at the top of the company: Dr. Oliver Frey, Managing Director and head of the insulbar division, left the plastics processing company at the end of January. The decision came in the light of differing views on the strategic direction to be taken within his areas of responsibility. The two Managing Directors Ralph Pernizsak and Dr. Roland Reber expressed their thanks, also on behalf of the family-owned enterprise's shareholders, for the many years of work performed by Dr. Oliver Frey in a variety of capacities.

In addition to his role as Managing Director, Ralph Pernizsak will be heading up the insulbar division. Before moving to Ensinger eight years ago, Ralph Pernizsak held a variety of managerial positions, for example with the Technotrans group, in Asia and Germany. Three years ago he was appointed Managing Director at Ensinger.

The advisory board, the shareholders of the family-owned enterprise and the Management Board have emphasised that the insulbar division continues to be of key importance to the Ensinger Group. From engineering, compounding and extrusion through to finishing, Ensinger covers the whole value added chain in the field of insulating profiles for windows, doors and façades. insulbar combines energy efficiency and sustainability and thus also embodies the corporate climate strategy.

The **Ensinger Group** is engaged in the development, manufacture and sale of compounds, stock shapes, composites, finished parts and profiles made from engineering plastics. To process the thermoplastic engineering and high-performance plastics, Ensinger uses a number of production techniques such as extrusion, machining, injection moulding, custom casting, sintering and pressing. With a total of 2,600 employees at 33 locations, the family-owned enterprise is represented in all major industrial regions worldwide with manufacturing facilities or sales offices.

Ensinger GmbH is one of the world's leading developers and producers of thermal insulating profiles for window, door and facade construction. The profiles marketed under the brand name insulbar® create a thermal barrier between the inner and outer shells of metal frames. Insulation solutions using insulbar profiles achieve the best values in terms of energy saving and reduced heating and air conditioning costs, while complying with the most stringent quality standards in every respect. They have been in successful application the world for more than forty years.
