

Surface protection film (transparent)

1. Material

The surface protection film (transparent) is a polyethylene-based, non-permanent protective film. The adhesive system is acrylate-based and the film is equipped with a release coating. The colour of the film is natural-transparent to opaque.

2. Application

The surface protection film primarily serves to protect against dirt and scratches during transportation, further processing or the assembly process. It can be used both indoors and outdoors (only with UV barrier film). The surface protection film should be removed from the surface no later than 6 months after use.

3. Technical data

	Einheit	Werte
Overall thickness	µm	~ 50
Adhesive power	N / cm	~ 1,3
Maximum application temperature	°C	70 for max. 1 h
